## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

**ICPSR PROCESSING NOTES FOR #36053**  
*Cognition and Aging in the USA (CogUSA) 2007-2009*

Dataset 1: Demographic Dataset

1. **Variable Formats:** In order to allow for greater compatibility across statistical packages, the variables **W1\_RESULTCODE**, **W2\_RESULTCODE**, and **W3\_RESULTCODE** have been changed from string format to numeric. The data contain only numeric values with assigned value labels.
2. **Stata Limitations:** Due to Stata limitations, the variables **HE\_GENDER**, **HE\_WHITE**, **W1\_HE\_DYAD**, and **W3\_HE\_DYAD** do not contain value labels for non-integer values within the Stata files.
3. **Weighting and Use:** The two datasets in this collection can be linked using the variable **SAMPID**. To obtain representative estimates, the weight variables **COGWT** found in dataset 1 must be used. For additional information on sampling and weights, please refer to the "Original P.I. Documentation" file.
4. **Associated Study:** This study is closely related to the Health and Retirement Study (ICPSR 6854). Please refer to the "Original P.I. Documentation" file for more details.

*Cognition and Aging in the USA (CogUSA) 2007-2009*

## **Cognition and Aging in the USA (CogUSA) 2007-2009**

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**
